

I feel satellite radio serves a public interest and safety concern. As an over the road driver(long haul trucker), I am unaware of local broadcast stations that inform the local public of traffic and weather news. I use my satellite radio to keep up to date about the weather and traffic in areas I am going to and am in at that time. I do not need to worry about finding a station to get this information, I already have access to this information, if this become unavailable to me in the future it would greatly hinder my ability to perform my job safely.
